

CSCI205 Final Project

Public

User Story

As a player, I want to be able to turn on a Christmas theme, so that I can get into the holiday spirit

link below to access trello board

<https://trello.com/b/H6qLPO1i/csci205-final-project>

To Do

christmas background toggle

E

switching main character to look more christmas like

M X

In Progress

merge into master

To Verify

add readme and writeups

tests

Done

basic UML for project presentation,
any interesting data structures?,
major algorithms,

JH

Christmas music toggle

JH

game over screen

E JH

title screen

M X

Sound

M

create player class

Have different waves that update

Have different towers

Be able to shoot as the player

Move in WASD

Users have money and gain money
from killing

Adding the menu that shows user
important information

Have aliens move and fight

Make towers cost \$

create fighter class

create player image

The user can die

create main game stage

created basic classes

towers can be placed

towers can shoot and kill aliens

Have aliens spawn

Completed User Stories

As a player, I want more of an introduction and ending to the game, so that I know what I'm doing

As a player, I want to be able to upgrade towers, so I can kill aliens more effectively

As a player, I want to be able to place towers, so that I can fight aliens

As a player, I want different waves, so the game gets more challenging

As a player, I want to be able to move, so that I can run from aliens

As a player, I want my towers to shoot, so they can kill aliens

As a player, I want a world to play in, so that I can play the game

As a player, I want a general menu, so that I can better interact with the game

As a player, I want to be able to see how much money I have, so that I can buy new towers

As an alien, I want to be able to move, so that I can kill the player
